Blessed Teresa of Calcutta Parish And

Have partnered in a new Fundraising Program!

Viridian Energy offers high-quality renewable energy products that meet or exceed the proposed 2020 federal environmental goal of 20% renewable energy. This allows our customers to choose energy that exceeds the renewable portfolio standards in their own states for rates that are often lower than the local utility. That's the Viridian Difference.

The Viridian Fundraising Program offers an innovative way for BTC to raise funds without over-burdening their parishioners. The program is simple and is a true win-win situation enabling BTC to raise funds without ever asking for money.

All you need to do is choose Viridian Energy as your third party energy provider, then Viridian pays BTC a commission of \$2 per active meter every month. Nothing out of your pockets, you save money on your electric bill, help the environment by using 20% green energy, and support BTC. All you need is a copy of your current PECO bill to sign up! There are no additional costs to you. You will still only receive one bill from PECO every month, and make your payments as you always have.

Energy deregulation means you can shop around to find the product that's best for you. You have a choice. Why wouldn't you make the choice that saves you money *and* helps the environment? You can make a difference for your family, BTC, and the environment with Viridian.

For more information or to start supporting BTC and saving money on your electric bill, click on the Viridian link, and then click on the "Become a Customer" leaf in the upper right hand corner of the page. www.Viridian.com/btcgoinggreen
